

Speedy Board[®] Model SB

The Bluff Speedy Board[®] allows the forklift driver to move, set in place, and retrieve the dock board without leaving the safety of the lift cage.

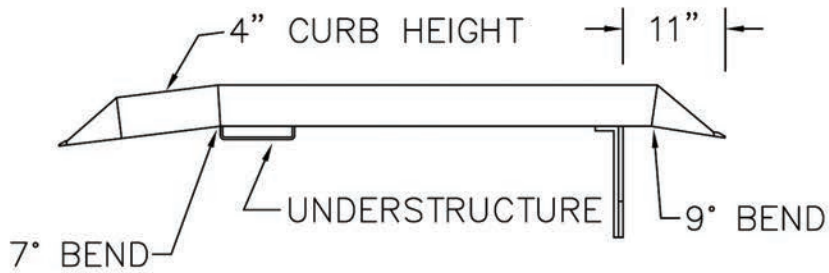

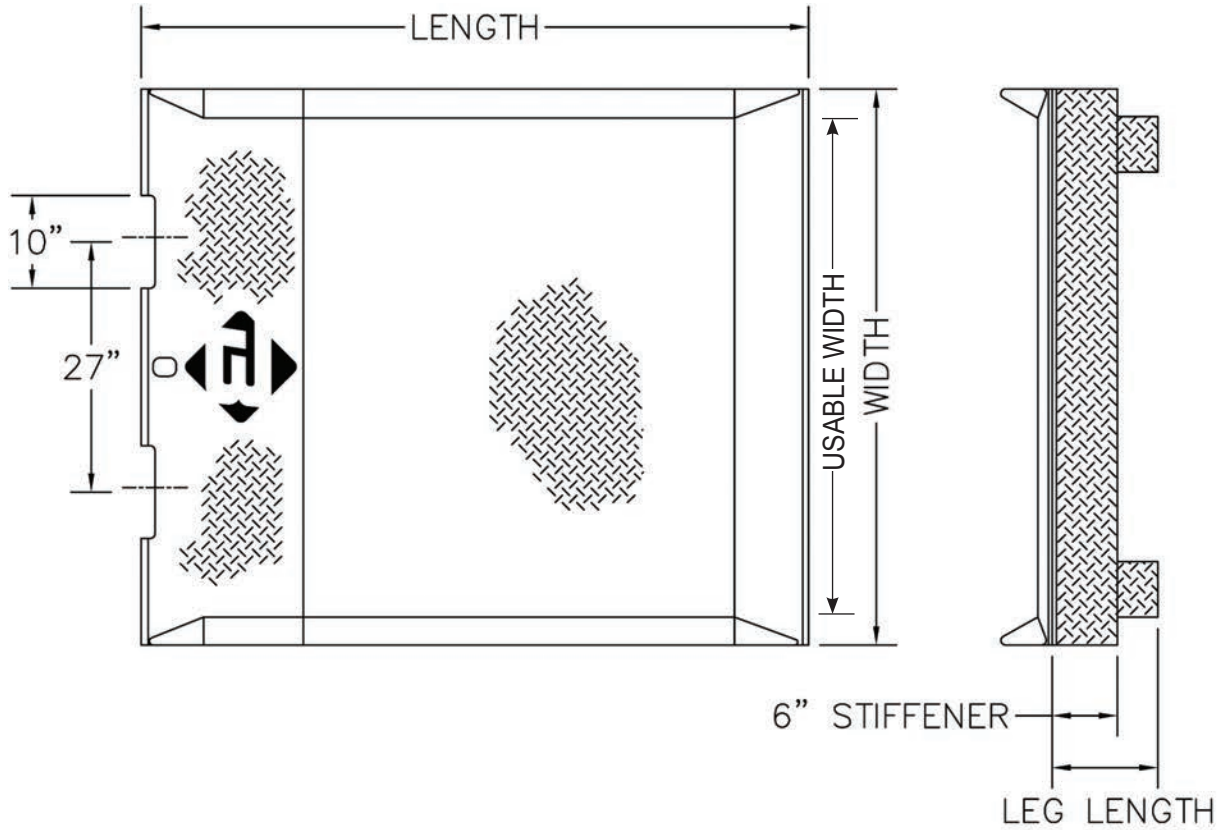

Speedy Board's[®] simple notch design on the leading edge of the board allows the driver to scoop up the board and move it to or from the dock without leaving the seat of the forklift cage, increasing safety and efficiency.

Speedy Boards[®], like all Bluff Manufacturing boards and plates, are ANSI tested and compliant. They are the *only* ANSI tested portable boards and plates on the market.

- RUGGED
- SAFE
- EFFICIENT
- ECONOMICAL

Manufactured and tested in compliance with ANSI Standard MH30.2
